White Rock Implementation Services

We take great pride in serving and giving back to those we service with missions in the non-profit sector. Here are our services:

For Implementation Services:

\$5,000 - To include Design, Configuration/Development, Testing, and Training. Data migration is a custom service but can fall within the above scope depending on record count. Migration services can be quoted prior to contracted services by taking an inventory of records, reviewing data quality, and ability to map to custom configuration. Services that are outside this scope will be additional charges at a rate of \$100/per hour discounted from the current rate of \$175 per/hour.

For Custom development:

If custom code for implementation is required, pricing is by the hour at a discounted rate of \$145 from the current rate of \$200. Custom code is any work requiring 3rd party integration, Apex, Visualforce, or Lightning Components.

For Annual Support:

Annual Support is provided to include Help Desk Support of users, Salesforce upgrade guidance, and changes to configuration that do not include new architecture, database changes, or custom code. Rates for Annual Support are 15% of initial implementation fees paid annually.
